CUSTOM INJECTION MOLDING

*We're focused
on you...*

Custom Injection Molding

Value Added

Tooling

Design

Our Engineers and Designers are experienced at teaming with our customers engineers and designers from the earliest stages of product development through product realization. This has always eliminated costly added trials and revisions.

Engineering Capabilities:

- Conceptual Design Review
- Product Design Assistance
- Models
- Prototype Mold Design
- Solidworks Stand Alone Stations
- Mold Flow

MOLDMAKING

Our state-of-the-art moldmaking facility is staffed by 20 accredited moldmakers, enabling us to closely monitor mold quality and progress. The latest technology, from wire EDM machines to CNC - EDM and CNC milling machines complement our conventional milling machines and grinders.

Our focus on maintaining up-to-date moldmaking technology allows Moldamatic to conduct special machining processes in-house, virtually eliminating the need for outside sources. This increases our control over your mold quality and delivery, saving you time and money!

Quality molded parts from start to finish since 1967

29 Noeland Ave. • Penndel, PA 19047-5288
Phone: 215-757-4819 • Fax: 215-752-1233

VALUE ADDED SERVICES:

- Part Design
- CAD/CAM/CAE
- Prototyping
 - SQC
- Painting
- Decorating
